1. Introduction

Memorix is a desktop application for the complete management of cemeteries. It allows you to manage plots, register deceased records, generate PDF reports, and view real-time statistics — all in a secure, fully offline environment.

What can you do with Memorix?

- Manage a full inventory of plots with their statuses and locations
- Register and look up deceased records
- Assign deceased to plots quickly and easily
- Search any record in seconds
- Generate print-ready PDF documents
- View real-time occupancy statistics
- Customize the system with the zone and type names your organization uses

Offline operation

Memorix stores all data on your own computer. No internet connection is needed to work. A connection is only required to activate your license and receive updates.

2. Installation

System Requirements

	Minimum
Operating System	Windows 10 (64-bit) or later
RAM	256 MB
Disk Space	150 MB free
Internet	Required only for activation and updates

Installation Steps

1. Download the installer **Memorix-Setup-1.0.0.exe** from the link you received after purchase.
2. Double-click the downloaded file.
3. If Windows shows a security warning, click **More info** and then **Run anyway**.
4. Follow the steps in the installation wizard.
5. When finished, Memorix will open automatically.

Note: No additional software is required. Memorix includes everything it needs to run.

3. License Activation

When you open Memorix for the first time, you will see the license activation screen.

How do I get my license key?

If you don't have a license yet, you can purchase one at:

memorix.lemonsqueezy.com/checkout

Your license key will be sent to your email address immediately after payment.

Activating your license

1. Copy the license key from your email.
2. Paste it into the **License key** field on the activation screen.
3. Click **Activate license**.
4. If the key is valid, the application will open immediately.

Important: The license is tied to the machine where it is activated. If you need to move to a different computer, please contact support.

4. Initial Setup

The first time you open Memorix, a setup wizard will guide you through three steps.

Step 1 — System Preferences

- **Language:** Choose between English and Spanish. All application text will switch to the selected language.
- **Theme:** Choose between Light mode and Dark mode.
- **Records per page:** Number of rows shown in tables (25, 50, or 100). The recommended value is 50.

Click **Next** when ready.

Step 2 — Organization Details

Enter your cemetery or organization details. This information will appear on any PDF reports you generate.

- **Name** (*required*): Name of the cemetery or company.
- **Address** (*optional*): Full address.
- **Phone** (*optional*): Contact number.

Click **Next** to continue.

Step 3 — All Set

Memorix shows a summary of its main features. Click **Get started** to begin using the application.

You can change any of these settings at any time from the **Settings** section.

5. Logging In

Every time you open Memorix, you will be prompted for a password before accessing the system.

- **Default password:** 1234
- It is strongly recommended to change this on first use via **Settings** → **Security**.

Changing your password

1. Go to **Settings** in the side menu.
2. Find the **Security** section.
3. Enter your current password and the new password twice.
4. Click **Save password**.

6. Dashboard

The dashboard is the main screen of Memorix. It shows a real-time summary of the cemetery's current status.

Statistics cards

Card	Description
Total plots	Total number of registered plots
Occupied	Plots currently assigned to a deceased record
Available	Plots that are free and ready to assign

Card	Description
Deceased	Total number of deceased records in the system

Click any card to go directly to the corresponding section.

Recent activity

At the bottom of the dashboard you will see the latest actions performed in the system: creations, edits, and deletions, each with a date and time.

If you have just installed the application and have no data yet, you will see a welcome message with shortcuts to get started.

7. Plots

The Plots section lets you manage all the spaces available in the cemetery.

Viewing the plot list

Click **Plots** in the side menu. A table will show all registered plots, sortable by any column.

Each plot displays:

- **Code** — Unique identifier
- **Type** — Plot, Niche, Mausoleum, etc.
- **Zone** — Geographic grouping within the cemetery
- **Location** — Position within the zone
- **Status** — Available, Occupied, Reserved, Maintenance
- **Assigned deceased** — If occupied, the name of the deceased

Adding a plot

1. Click + **New plot**.
2. Fill in the form:
 - **Code** (*required*): Unique identifier. E.g.: **A-001**, **N-012**.
 - **Type**: Select the type of space.
 - **Zone and Location**: Select from the configured categories.
 - **Initial status**: Normally "Available".
 - **Price** (*optional*): Cost of the plot.
 - **Notes** (*optional*): Additional observations.
3. Click **Save**.

Editing a plot

1. Click the **edit** icon (pencil) on the plot's row.
2. Modify the necessary fields.
3. Click **Save**.

Deleting a plot

1. Click the **delete** icon (trash) on the plot's row.
2. Confirm the deletion in the dialog.

Note: You cannot delete a plot that has a deceased record assigned to it. You must first reassign or delete that deceased record.

Plot statuses

Status	Meaning
Available	The plot is free and can be assigned
Occupied	A deceased record is currently assigned to it
Reserved	Reserved but not yet occupied
Maintenance	Temporarily out of service

The status changes automatically to **Occupied** when you assign a deceased record to the plot, and returns to **Available** when that record is deleted or reassigned.

8. Deceased Records

The Deceased section manages all records of people registered in the system.

Viewing the deceased list

Click **Deceased** in the side menu. The table shows all records with their main details.

Adding a deceased record

1. Click **+ New deceased**.
2. Fill in the form:

Personal details

- **Full name** *(required)*
- **ID / Identity document** *(optional)*
- **Date of birth** *(optional)*
- **Place of birth** *(optional)*

Death details

- **Date of death** *(optional)*
- **Cause of death** *(optional)*

Assignment

- **Plot:** Select an available plot from the dropdown. The plot will automatically change to Occupied status.

Additional notes *(optional)*

3. Click **Save**.

Editing a deceased record

1. Click the **edit** icon on the record's row.
2. Make the necessary changes.
3. Click **Save**.

Deleting a deceased record

1. Click the **delete** icon on the record's row.
2. Confirm in the dialog.

When you delete a deceased record that had a plot assigned, that plot automatically returns to **Available** status.

9. Search

The search feature lets you find any record quickly across all data in the system.

How to search

1. Click **Search** in the side menu.
2. Type any term in the search field: name, surname, plot code, ID number, etc.
3. Results appear automatically as you type.

Available filters

You can combine several criteria at once:

- **Name / Surname**
- **Date of death** (from / to)
- **Assigned plot**

Actions from search results

From the results table you can edit or delete any record directly, without navigating to the corresponding section.

10. PDF Reports

Memorix lets you generate PDF documents from any list for printing or archiving.

Generating a report

1. Go to the section you want to export: Plots, Deceased, or Search.
2. Apply any filters or sorting you need.
3. Click the **Export PDF** or **Print** button.
4. A document preview will open.
5. From the preview you can print directly or save as a PDF file.

Report contents

Each report automatically includes:

- Your organization's name (configured in Settings)
 - Date and time of generation
 - Table with all visible records
 - Total record count
-

11. Settings

Access settings from the gear icon in the side menu.

Organization

Your company or cemetery details that appear on PDF reports.

- **Organization name**
- **Address**
- **Phone**

Click **Save changes** after modifying any field.

Appearance

- **Theme:** Switch between Light and Dark mode at any time.
- **Language:** Toggle between English and Spanish. The change is instant.
- **Records per page:** Control how many rows are shown in tables.

Security

- **Change password:** Enter your current password and the new password twice.

System

Shows information about the application version and operating system.

12. Labels & Categories

Labels let you customize the available values for the **Type**, **Zone**, and **Location** fields of plots, adapting them to the terminology your organization uses.

Managing labels

1. Go to **Settings** and find the **Labels & Categories** section.
2. You will see three groups: **Plot type**, **Zone**, and **Location**.

Adding a value

1. Click **+ Add** inside the relevant group.

2. Type the new value (e.g.: **North Sector**, **Crypt**, **Row 3**).
3. Press Enter or click confirm.

Deleting a value

Click the **X** next to the value you want to remove.

Warning: You cannot delete a value that is currently used by one or more plots. You must update those plots first.

Default values

When Memorix is installed, the following values are created automatically based on the language chosen during setup:

Group	English values	Spanish values
Type	Plot, Niche, Mausoleum	Parcela, Nicho, Mausoleo
Zone	New, Old	Nuevo, Antiguo
Location	Left, Center, Right	Izquierda, Centro, Derecha

13. License

Viewing your license status

Go to **Settings** and find the **License** card. You will see:

- Whether the license is active
- The email address used for the purchase
- The expiry date (if applicable)

Renewing your license

When your license expires, you will see a notice when opening the application. You can renew it at the store:

memorix.lemonsqueezy.com/checkout

Deactivating your license

If you need to move Memorix to a different computer:

1. Go to **Settings** → **License**.
2. Click **Deactivate license**.
3. Confirm the action.
4. The application will close. You can now activate the same key on the new computer.

14. Frequently Asked Questions

Where is my data stored? All data is stored on your computer, in the Windows user data folder (%APPDATA%\memorix\). No data is sent to any external server.

Can I use Memorix without internet? Yes. Once the license is activated, the application works completely offline. Internet is only needed to activate the license and receive updates.

How do I back up my data? Copy the file `cementerio.db` found in %APPDATA%\memorix\ to a safe location (external drive, cloud storage, etc.). To restore, simply copy the file back to the same folder.

I forgot my password. What do I do? Contact support at bblottus@gmail.com and include your organization name. We will provide instructions to reset access.

Can I install Memorix on more than one computer? The license allows one active installation at a time. If you need to switch computers, deactivate the license on the current machine before activating it on the new one.

Are updates free? Yes. All updates published during your active license period are installed automatically when you open the application.

What happens to my data if I don't renew my license? Your data stays on your computer. If you decide to renew in the future, the application will recover everything exactly as you left it.

15. Support

If you have any questions, technical issues, or need help with setup, please contact us:

 bblottus@gmail.com

Please include in your message:

- Description of the issue or question
- Memorix version (visible in Settings → System)
- Your Windows version

Typical response time: **1–2 business days.**

Memorix v1.0.0 — Professional Cemetery Management Software

Thank you for choosing Memorix.
